Dear «Name1»

T. Boone Pickens, last election, financed “*Swift Boat*”. This election, *PickensPlan* arms Democrats. Why the change?

What we say does not matter. It is what people hear that resonates. Ella Fitzgerald said, “it doesn’t mean a thing if it ain’t got that swing.” Our Republican message this year is a failure on both counts: rationally *and* emotionally.

Our messenger’s handlers are out-gunned, out-thought, and off message. They fueled a perception that White House strategy is inching toward Obama’s position on Iran, Iraq, and Afghanistan. All four ‘Grid’ quadrants of basic Campaign Strategy 101 are ignored. “Largest transfer of wealth in the history of mankind” – OR – “let’s build America’s economy by cutting off petrodollars” (denying our enemy resources) should be our message instead of *let’s drill ...*

Each of us knows the implications if we remain on defense: I am as much aware as you are about those consequences. Greenbay Packer Head Coach Vince Lombardi - “Offense is best defense /4th quarter.” It is still not too late. Nevertheless, a messenger with entrepreneurial, military command & planning, and major campaign experience is needed.

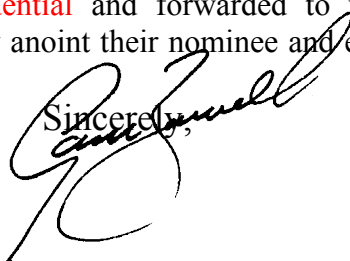

Americans want someone who motivates diverse, high-return industries capable of equalizing our International Trade imbalance. It helps to have been intimately involved in politics, a strategic associate in business, and tactical planner in military operations.

It is up to «State» to draft that individual in Minnesota. If not, it will be an “Obama-ination” presidency of being “Present” with U.N. *normalized concessions*. That could be worse than pump prices in next year’s consumer economy.

As a lowest bidder, performing “with-in budget”, I created surpluses on highly successful government defense contracts, aerospace/space exploration for small and multi-Billion dollar businesses; new goals i.e.: global markets for “made in America” products, co-production opportunities using fifth-level *green* technology applications to suppress global warming as solar dimming becomes history. My proven ability to bring 500 global entities together towards a common goal plus 1970’s success in changing national perceptions far exceeds Congressional hand-shaking junkets.

Restoration of individual rights, belief in our Constitution as is; urging each American to protect family in this great democracy: these are my campaign planks. «State» delegate votes for this agenda will assure a Republican win in November. I proudly penned this message.

This must remain **confidential** and forwarded to your convention delegates without alerting Democrats and media before they anoint their nominee and exit Colorado unaware of a new, invigorating Republican strategy.

Sincerely,

Confidential

This is one of four letters suggesting an offensive strategy for the win.

You can review all four letters at
